

EIZO Endorses the Recommendations of the Task Force on Climate-related Financial Disclosures (TCFD)

Hakusan, Japan, May 20, 2021 – EIZO Corporation (TSE: 6737) today announced its support for the recommendations of the Task Force on Climate-related Financial Disclosure (TCFD)¹ established by the Financial Stability Board (FSB)². EIZO also plans to join the TCFD Consortium³, a forum for discussion among supporting companies and financial institutions.

Based on the corporate philosophy of "Realizing a prosperous future society through imaging," EIZO continues its corporate activities with environmentally friendly manufacturing as a base starting point. Recognizing that corporate activities in harmony with the environment are one of the most important corporate objectives, EIZO always gives careful consideration to the environment impact in both its production and business activities. It also strives for effective use of resources, efforts to mitigate climate change, environmental conservation including protection of biodiversity and ecosystems, prevention of pollution and reduction of environmental risks.

In recent years, EIZO has further accelerated its efforts to reduce CO₂ emissions from business operations by setting targets of a "70% reduction from FY2017 levels by FY2030" and "ZERO by FY2040".

With this in mind, EIZO has decided to endorse the TCFD in order to further promote its efforts and information disclosure on climate change from an international perspective. Under its new sustainability promotion structure, EIZO will analyze the risks and opportunities posed by climate change to our business and strive to take necessary actions and expand disclosure of relevant information.

Through these efforts, EIZO will continue to make further contributions to the realization of a sustainable society while enhancing its corporate value by further promoting cutting-edge environmental responsiveness throughout its supply chain.

¹ [The Task Force on Climate-related Financial Disclosures \(https://www.fsb-tcfd.org/\)](https://www.fsb-tcfd.org/)

In response to a request from the G20, the Financial Stability Board (FSB) established the TCFD to examine climate-related disclosure and responses by financial institutions. TCFD encourages companies and other organizations to disclose their governance, strategy, risk management, indicators and targets with respect to climate change-related risks and opportunities.

² [Financial Stability Board \(https://www.fsb.org/\)](https://www.fsb.org/)

Established in 2009, the Financial Stability Board (FSB) is an international organization that monitors and makes recommendations about the global financial system to promote financial stability.

³ [The TCFD Consortium \(https://tcfd-consortium.jp/en\)](https://tcfd-consortium.jp/en)

The TCFD Consortium, established in 2019 in Japan, is a forum where companies and financial institutions that support the TCFD recommendations can work together to discuss effective climate-related information disclosure and how such information can be used by financial institutions to make appropriate investment decisions.
